

Why Customers Choose Ameresco Solar

For more than three decades, the Ameresco Solar team has been providing solar energy solutions to customers just like you — using its talent and experience to generate a good payback. The company offers a full range of services from a broad array of products to engineering and design/build capabilities. Our full document control ensures access to your diagrams and records for as long as you need them.

Customers around the globe rely on Ameresco Solar because of its...

- Excellent Support
- Superior Integration
- Well-recognized, High-quality Products
- Speed of Delivery
- Extended Warranties
- Troubleshooting Services

Ameresco is an independent energy-solutions company delivering long-term customer value through independence, flexibility, talent, and innovation.

Green. Clean. Sustainable.

Why Ameresco Solar

Solar electric power, known as photovoltaic (PV) technology, makes use of the abundant energy from the sun. It can be used in a wide range of products, from small consumer items to large commercial solar electric systems.

Photovoltaic:

- Contributes to energy security
- Is modular and flexible in terms of size and applications
- Serves both form and function in a building
- Is produced locally
- Meets demand and capacity challenges
- Helps manage energy uncertainty and mitigate risk
- Is cost-effective

Solar electric power, which was once a niche market for remote industrial applications, has grown into a business that delivers power to villages in the developing world and supplies electricity to the grid in developing countries around the world.

Few power-generation technologies have as little impact on the environment as solar power. It quietly generates electricity from light and produces no air pollution or hazardous waste. It doesn't require liquid or gaseous fuels to be transported or combusted. And because its energy source—sunlight—is free and abundant, it can guarantee access to electric power.

To learn how you can integrate solar power into your environment, contact Ameresco Solar today.
