

# Locomotive Shock Absorbers & Friction Snubbers

Enidine and Koni, working together to save you time and money by working directly with the factory. Enidine now stocks KONI original equipment designs for all GE and EMD applications (referenced below) assuring direct and immediate delivery to you. All of the 02 or 04 Series designs are rebuildable. Contact us to implement your factory direct overhaul program or ask us about our newly released 97 Series which provides a low cost alternative to the rebuildable counterpart.

Replacing worn shock absorbers not only maintains a comfortable level of ride quality, but also reduces wheel wear and extends the life of other truck components.

For factory direct service and competitive prices, contact Enidine for all your locomotive ride control requirements at 716-662-1900 x 124 or fax us at 716-662-1909.
