

Tools of the Trade

The complete railcar repair billing, inspection and operations management system

Car Repair Billing

Reduce errors, increase pricing flexibility and make invoicing quick and easy.

- AAR, NITL and User Definable Repair Rules
- AAR/RAC Price Master and Contract Rates
- ASCII Data Exchange Files
- Bulk Add/Edit Multiple Repairs at Once

Inventory Management

Simplify inventory tracking, purchasing, pricing and consumption.

- Monitor Part Consumption
- Track Low, On-hand and On-order Quantities
- Generate Purchase Orders
- Automatically Allocate Inventory to Specific Repairs

Handhelds

Access and utilize ExpressYard from anywhere in the facility via a rugged wireless handheld.

- Synchronize Data, Validate Repairs and Check Umler EMIS in the Field
- Reduce Inspection Time and Avoid Redundant Data Entry
- Increase Repair Data Entry Accuracy

Inspection

Significantly reduce errors and simplify car repair data collection.

- Expedite Car Write Ups
- Eliminate Costly Translation and Interpretation Errors
- Print or Email Estimates for Customer Approval
- Instant Access to Umler EMIS, Early Warning and Maintenance Advisory Data

Production Scheduling

Create a Production Timeline by Assigning a Custom Schedule to Specific System Tasks.

- Provides an Online Snapshot of Workflow Throughout Your Facility
- Identifies Areas with Available Capacity
- Analyze/Report on Actual Time Spent versus Time Forecasted
- Alert Car Owners to Status of Their Cars

Umler/EMIS Data

Significantly reduce time spent looking up car information and identifying necessary repairs.

- Ability to see Early Warnings, Maintenance Advisories and Air Brake Test dates in one system
- Automatic Identification and Submission of Repairs That Need to be Reported to Railinc

Labor Tracking

Quickly and easily enter, manage and run reports on employee hours.

- Assign Labor to Specific Repairs
- Enables Grouping and Analysis
- Facilitates Forecasting and Efficiency Tracking

Yard Management

Easily monitor and manage the movement of cars within your facility via the Internet.

- Accurate Views of Your Equipment
- Umler EMIS Validation
- Switch List Generation

Online Access

Worry-free answers to everyday issues including security, accessibility, accuracy and simplicity.

- 24/7/365 Secure Access from any Internet-enabled PC
- Automatic Updates and Backup
- Enter/Access Data On- or Off-Site

**Outfit your railcar inspectors
with the tools they need...**
